Subscribing to NDAAlert Emergency Messaging Notification

The University of Notre Dame provides an alert notification system for Notre Dame faculty, staff, students, and other campus community members. This mass notification, known as "NDAAlert," provides timely announcements regarding severe weather, campus emergencies, or other safety situations on the Notre Dame campus via mobile text messaging, email, and other electronic communication channels.

Visitors, contractors, and affiliates can also receive emergency alerts by way of text message once they subscribe to the campus mass notification database.

- **To enroll for one week, text: NDALERTMYVISIT to CAMPUS (226787)**

Enrollment will expire 7 days from the date of enrollment

- **To enroll for up to 365 days, text: NDALERTME365 to CAMPUS (226787)**

Enrollment will automatically expire on July 31st of each year

As soon as the selected time period expires, users are sent a reminder with instructions on how to re-enroll. If subscribers fail to re-enroll, their information is removed from Notre Dame's emergency notification system. This simple process enhances the safety of anyone visiting, working or participating in an event on campus.

You will receive confirmation for your subscription as well as [information](#) on leaving the list or stopping all messages. Message and data rates may apply.

<https://emergency.nd.edu/nd-alert/sms-opt-in/>

All Notre Dame full-time, part-time and temp employees and students are already registered to receive ND Alerts provided their [emergency contact information](#) is current in InsideND.
